TECHNICAL SKILLS

- **Frontend:** React.js, TypeScript, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS
- **Backend:** Node.js, Express.js, REST APIs, JWT Authentication, Prisma ORM
- **Languages:** TypeScript, JavaScript, Java, Python
- **Databases:** PostgreSQL, MongoDB, MySQL
- **Tools:** Git, GitHub, GitHub Actions, Jest, Supertest, Postman, Prisma, Cloudinary, Render
- **Core CS:** Data Structures & Algorithms, OOP, DBMS

PROJECTS

Jobify – Full Stack Job Portal

2026

React.js, TypeScript, Node.js, Express.js, PostgreSQL, Prisma, Jest, Supertest, CI/CD

- Developed and deployed a production-ready full-stack job management platform with authentication, job tracking, analytics dashboard, and role-based access control (RBAC).
- Designed and implemented 10+ RESTful APIs using Express.js and Prisma ORM for authentication, profile management, job CRUD operations, filtering, search, and statistics.
- Migrated backend architecture from JavaScript, MongoDB, and Mongoose to TypeScript, PostgreSQL, and Prisma ORM, improving type safety and database reliability.
- Implemented secure JWT authentication using HTTP-only cookies, protected routes, middleware authorization, and user/admin access control.
- Integrated automated API testing with Jest and Supertest and configured GitHub Actions CI/CD pipeline with Render for automated testing, build validation, and deployment.
- **Live:** Jobify Application

Real-Time Anomaly Detection in IoMT Networks

2025

Machine Learning – Python, Scikit-Learn, Pandas

- Developed a stacking ensemble model using Random Forest, Gradient Boosting, and KNN for healthcare anomaly detection.
- Built a stacking ensemble model combining Random Forest, Gradient Boosting, and K-Nearest Neighbors classifiers to improve detection performance.
- Processed and balanced **300,000+** IoMT network traffic records using feature engineering, encoding, scaling, and resampling techniques.
- Achieved **95.1% accuracy**, **99.8% precision**, and **94.9% F1-score**.

Music Streaming App – Frontend Application

2024

React.js, Tailwind CSS, React Router

- Built and deployed a responsive music streaming web application inspired by modern streaming platforms using React.js and Tailwind CSS.
- Developed reusable UI components, client-side routing, playlist views, and responsive layouts optimized for desktop and mobile devices.
- Implemented dynamic rendering of music collections, navigation menus, and interactive user interface elements using React state management.
- Improved user experience through responsive design principles, component reusability, and clean visual hierarchy.
- **Live:** Music Streaming App

EDUCATION

B V Raju Institute of Technology

Telangana, India

B.Tech in Computer Science (AI & ML) – CGPA: 7.80 / 10

2022 – 2026

Kakatiya Junior College

Nizamabad, Telangana

Intermediate (MPC) – 89.3%

2020 – 2022

CERTIFICATIONS

- Programming in Java – NPTEL (2024)
- Python 101 for Data Science – IBM (2024)
